  - JH/JV Football vs Mound @ 5:00. Players will leave @ 3:00 on the practice bus.

Thought for the Week: The Bosavi woolly rat was discovered in 2009. Believed to be the biggest rat, it is more than 32 inches long (including the tail) and weighs more than three pounds. By comparison, the common rat is about 20 inches long and weighs approximately 12 ounces.

\* What element is not on the periodic table? The element of surprise.
